Mission Statement

Our mission is to pioneer scientific innovation in the field of plasma proteins and biotechnology and to manufacture and supply effective, high quality therapies that improve and extend the lives of patients throughout the world.

Vision

Our vision is to be the most respected company by continuously setting the highest standards in all aspects of our business.

Business Principles

Provide patients with uncompromising quality and value-added service.
We will produce our products according to the highest quality standards and provide support that adds value for healthcare providers and improves patients' lives.

Sustain a firm commitment to business and scientific ethics.
We will operate with integrity on the basis of just and ethical decision-making that is in the best interest of all of our constituents.

Manage for long-term success.
We will invest in our business and manage our human and natural resources for the long-term benefit of our stakeholders.

Maintain a flexible operating style.
We will create and support an environment that allows individuals to adapt quickly and decisively to changing conditions and customer needs. We will challenge conventional wisdom and question the value of everything we do, in order to find new and better ways of fulfilling our mission.

Partner with employees.
We will invest in our employees to enable them to achieve their potential. We will encourage and expect initiative and innovation from every employee and a demonstrated commitment to the spirit of cooperation.

Value diversity.
We will value and respect the diversity of people in order to create a unique business culture that capitalizes on the strengths of the individual while encouraging success through teamwork.
